

# BYD Home Energy System

Based on the BYD Fe Battery technology and perfect IT resource integration capacity, BYD can provide the best solution and the most reliable services.

## HES-A1000

BYD Home Energy System – **A1000** is specially designed for off-grid application, with all main components assembled in one box, the system is small and portable.

**HES-A1000** is the best solution for non-grid area to satisfy the basic demand of energy.

### System parameters

Electrical Characteristics	
Output Voltage	AC 220V 50Hz/60Hz
	AC 110V 50Hz/60Hz
	AC 100V 50Hz/60Hz
Output Power	MAX:1000W(Elevation<2000m)
Battery Capacity	2400Wh
PV Panel	230W*2
Mechanical Characteristics(Host)	
Structure of the cabinet (W*H*D)	430*630*250 mm
Net Weight	58± 1 Kg
IP Grade	IP23
Operating Temperature	0~45℃
Storage Temperature	-20~60℃

### Net Power System, Division 2, BYD

Address: No.1 Baoping Road, Baolong Industrial Town, Longgang Shenzhen, 518116, China

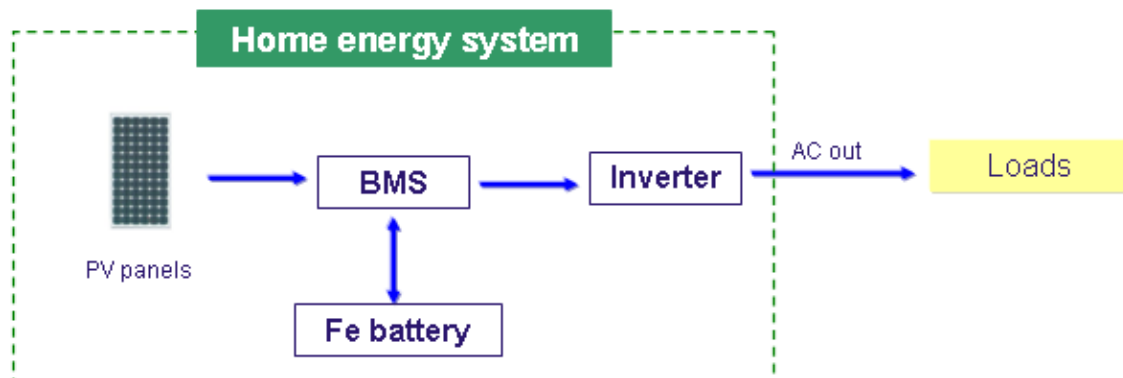

E-mail: [netpower@byd.com](mailto:netpower@byd.com)

## System topology

## Advantages

- Integrated design, easy to assembly and maintenance
- Redundant safety design to cope with component failure or abusive conditions
- BYD Fe battery: The Fe battery has excellent advantages such as long service time, excellent efficiency with the charge and discharge, safety, high energy density, nice temperature performance and no pollution
